Soiless Growing Mix

USAGE GUIDE - For professional greenhouse and nursery container use.

Blend Name	Seed Germination & Plug Trays	Cutter Liner Propagation Trays	Cell Pack	Pots	Hanging Baskets
BX / BXM		X	X	X	X
PGX	X				
HP / HPM		X		X	X
FPX	X	X			
BXG			X	X	X
MPMO		X		X	X

ADDITIVES:
 -Bio-Fungicide
 -Chunk Coir
 -Mycorize

SPECIFICATIONS - Descriptions, sizes, and pallet quantity

BX / BXM

PRO-MIX BX is a solution for growers seeking to benefit from both the nutrient retention ability of vermiculite and a perlite content providing limited but proper drainage capacities. Combined with high-quality fibrous peat moss, this formulation is ideal for growers looking for a general purpose medium which creates a well-balanced growing environment.

Size	Units/Pallet
3.8 cu ft	30/Pallet

PGX

Balance and precision are essential in horticulture, even more so at the beginning of a crop. PRO-MIX PGX is formulated with vermiculite for increased buffering capacity and nutrient retention at the early stages of plant growth. This carefully developed formulation optimizes plant growth by creating a root zone environment that is well adapted for plug production and seed germination applications.

Size	Units/Pallet
3.8 cu ft	30/Pallet

HP / HPM

With its high perlite content, PRO-MIX HP provides a great growing environment to growers looking for a significant drainage capacity, increased air porosity and lower water retention. The added benefit of fibrous peat moss and coarse perlite makes this formulation ideal for growers who require a superior-quality product adapted to their needs for watering flexibility and crop seasonality.

Size	Units/Pallet
3.8 cu ft	20/Pallet
	30/Pallet

FPX

Providing an optimized growing environment is fundamental, especially when it comes to plugs and germination, as it will define future productivity levels. PRO-MIX FPX is well adapted for water-sensitive crops by providing low water retention levels and good air porosity for developing seedlings.

Size	Units/Pallet
3.8 cu ft	30/Pallet

BXG

BXG is the Classic BX all-purpose growing mix combined with Hydrogel, which holds available water near the roots, making it an excellent mix for plants needing frequent watering or receiving less than ideal care once they leave the greenhouse.

Size	Units/Pallet
3.8 cu ft	30/Pallet

MPMO

Multi-Purpose Mycorrhizae Organik is recommended where high air capacity and fast drainage are needed: during the winter month, with water and salt sensitive crops, or where frequent leaching is required.

Size	Units/Pallet
2.8 cu ft	30/Pallet
3.8 cu ft	

OPTIONAL ADDITIVES:

-Bio-Fungicide: Protects against damping-off, crown and root rots. Enhances germination. Increases plant growth. Reduces risk of pathogens developing resistance to chemical fungicides. Ensures a broad spectrum of action against diseases.

-Chunk Coir: Coir is a natural product which comes from the exterior envelop of an aged coco fruit. It improves physical properties to increase porosity for higher aeration and drainage and maintains its structure when in use which is important for long term crops.

-Mycorize: Technology is a Biological Growth Enhancer that increases the yield of flower, fruit and vegetable plants by extending the root system to acquire the most of available nutrients in the soil. Mycorrhizae also improve resistance to root diseases and stresses.
